

Software Engineering student experienced in building production-grade full-stack web applications and optimizing enterprise IT systems. Proficient in object-oriented design, modern frameworks (C#/.NET, Angular), and AI-driven development workflows, with a strong background in cross-functional team collaboration to deliver scalable, user-centric software solutions.

Education

- B.S. Software Engineering, Iowa State University 3.43 GPA - Dean's List Fall 2024 & Spring 2026	Aug 2023 - May 2027
--	---------------------

Skills

- Languages:** C#, Java, Python, C/C++, TypeScript, JavaScript
- Technologies:** REST APIs, .NET, ASP.NET, EF Core, Node.js, Angular, React, SQL, MongoDB, Neo4j, JDBC, Claude Code, Google GenAI SDK, Streamlit, Pandas, Git, ADO, Linux/macOS, Windows, Microsoft Intune
- Other:** Data structures, Algorithms, Object Oriented Programming (OOP), Computer Science fundamentals

Work Experience

IT Assistant	Dickinson, Bradshaw, Fowler & Hagen, P.C. Des Moines, Iowa	Aug 2026 - Present
Mitigated technical downtime risks for legal practice teams by managing enterprise hardware deployments, executing network troubleshooting, and administering Active Directory to optimize software systems.		
Software Engineer Intern	Corteva Agriscience Johnston, Iowa	May 2026 - Aug 2026
Translated complex agricultural requirements into a production-ready, full-stack web application (C#, .NET, TypeScript, Angular), leveraging Claude Code to accelerate development, streamline feature delivery, and deploy real-time dashboards.		
IT Intern	Dickinson, Bradshaw, Fowler & Hagen, P.C. Des Moines, Iowa	May 2025 - May 2026
Modernized user infrastructure by configuring and deploying 75+ Intune-managed devices for 85+ users, and authored technical documentation that cut average IT ticket resolution time by 75%.		

Projects

- Time-Series Forecasting System | (Python, Streamlit, SciPy, Darts)**
Building an interactive frontend-to-backend data dashboard allowing users to quantify and visualize the impact of lossy data compression on time-series forecasting accuracy.
- NourishBox Website | (React, Node.js, MongoDB)**
Developed a full-stack meal plan subscription web app with user authentication, product search, an interactive shopping cart, and third-party REST API integrations.
- CyCourse | (Java, Springboot, Android, SQL)**
Engineered backend services for a student scheduling and course review app featuring automated schedule generation, real-time messaging, and Google Maps API integration.
- Resume Analyzer | (Python, Streamlit, Google GenAI SDK, Pandas)**
Developed an interactive full-stack AI utility that parses PDF resumes, interfaces with the Gemini API for deep qualitative evaluations.

Leadership

Pledge Marshal	Theta Chi Fraternity - Alpha Mu Chapter	Nov 2023–Nov 2024
Guided freshmen in transitioning from high school to college life by providing support, mentorship, and resources for academic and personal development.
